Find the sum of the following fractions

$$\frac{4}{9} + \frac{7}{18} = \frac{4*2}{9*2} + \frac{7}{18} = \frac{8}{18} + \frac{7}{18} = \frac{15}{18}$$

$$\frac{4}{13} + \frac{3}{26} =$$

$$\frac{4}{4} + \frac{3}{12} =$$

$$\frac{4}{5} + \frac{4}{11} =$$

$$\frac{5}{6} + \frac{9}{12} =$$

$$\frac{2}{6} + \frac{2}{3} =$$

$$\frac{1}{16} + \frac{3}{8} =$$
